TOP-MOUNT SAND FILTER

Reliable Filtration. Built for Long-Term Performance.

The Top-Mount Sand Filter is designed to provide reliable and consistent filtration for swimming pool applications. Its corrosion-resistant polymeric tank and optimized internal water distribution system support efficient flow through the sand media, while the self-cleaning laterals are intended to improve filtration, backwashing, and ease of maintenance.

KEY FEATURES

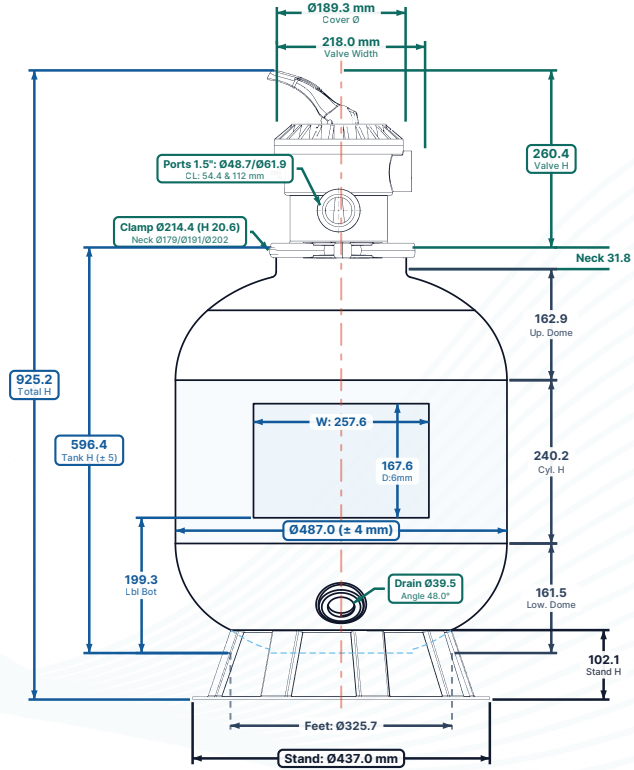

- Corrosion-resistant polymeric construction
- High-efficiency internal flow design
- Self-cleaning laterals
- Top-mounted multiport valve
- Optimized water distribution across the sand media
- Manual air relief system
- Easy servicing and maintenance
- Available in 16", 19" and 24" sizes

TECHNICAL **SPECIFICATIONS**

Specification	19"
Diameter	19"
Designed Flow Rate	9.5 m^3/h
Filter Area	0.20 m^2
Sand Media	80 kg
Max. Operating Pressure	50 PSI / 3.5 bar
Mounting	Top
Valve Configuration	6-Way 1½" Valve
Product Weight	10 Kg

19" TOP-MOUNT SAND FILTER — MODEL 50L (Ø487 mm)
Total H: 925.2 mm | Tank OD: Ø487.0 mm | OFC: 74.76 L ± 3L | Empty: 6.6 kg

19" TOP-MOUNT SAND FILTER — MODEL 50L (Ø487 mm)
